

REGIONAL PROCUREMENT

We work together with excellent suppliers. Distances between us are becoming shorter and shorter – to benefit the environment and to safeguard supply chains.

Approx. 85 % of our components come from the EU, approx. 75 % from Germany. Around two thirds of all parts are sourced within a radius of just 250 km.

DURABLE PRODUCTS

Excellent quality and durability are paramount to us during product development, material selection and production.

MARTOR safety knives (with interchangeable blades) can then be used for longer. This also significantly reduces material consumption.

RECYCLED PLASTICS

We want to conserve resources, at first in the area of plastics. This applies to both new and existing products. As many components as possible are being switched to recycled plastics.

We are also developing strategies to recycle raw materials at the end of the product's life cycle.

CERTIFIED PACKAGING

Sustainability is an all-round, integrated mission for us. That's why the packaging we use for our individual and multipack products is made from over 90 % recycled material and 100 % recyclable material.

Future packaging of our products will also increasingly use FSC-certified cardboard – starting with our safety knives made of recycled plastic. Paper-based instructions are to be replaced by QR codes.

ONE PROBLEM – ALL SOLVED.

To cut at a distance is often a literal balancing act for users. That is why the MARTOR range now includes a CONNECTOR with matching TELESCOPIC POLE. Available separately or as a SET, they allow you to significantly extend your reach and work efficiently and safely.

CONNECTOR NO. 9946

More reach in combination with the TELESCOPIC POLE

Compatible with:
(not included in delivery)

INDIVIDUAL AND SUSTAINABLE. NEW FEATURES FROM MARTOR FOR SPRING 2023.

ONE FAMILY – ALL ECO.

MARTOR is continually improving its sustainability – as an organisation, as an employer and as a manufacturer and supplier of high-quality cutting solutions. By using recycled plastic as their base material, the SECUMAX 350 SE and SECUMAX 148 safety knives represent the start of a new product era.

ONE PRODUCT – ALL POSSIBILITIES.

You are optimally equipped with MARTOR. For example, our excellent handles are designed to accommodate a variety of different blades. Such as in the SECUPRO 625, our premium squeeze-grip knife. Pre-mounted blades ranging from trapezoid through to hook are possible, and with the flexibility to change them.
